Controllers

- The control is the object that can help you play your video game. The controller contains with buttons and an analog. Also you can charge the control with a game charger or a phone charger.

Console

- The game console helps the game work. If you can see this console is the home brand of the Xbox one. There is also a skinny rectangle which you can put the CD game into the console.

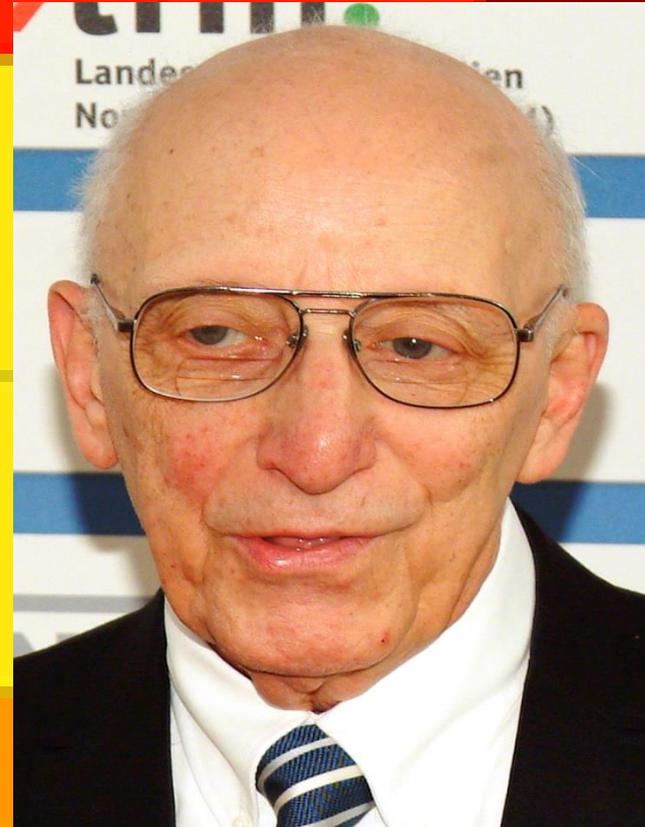

Brands

- Video game console also have brands like Xbox, the Wii, Nintendo and Play station. Even video games have their own brands like sports game are the EA sports brand and Sonic the hedgehog was made from SEGA.

Games

- There are games that people can play. Did you know the inventor of video games was Ralph H. Baer he was born in March the 8th of 1922 and he died on the 6th of December in 2014.

Xbox

The Xbox was created by the company that put all their work into making a Xbox. Their first console was the Xbox 360 and then they added a Xbox Kinect which that your body is the control and then they made the latest Xbox called the Xbox one.

Play station

- The Play station is a console which everybody can play as a singer, a dancer or even a smart person. The person who invented the play station also invented a play station on the go which is called a PSP.

Sega Moonwalker

- My favourite game I liked was called Michael Jackson Moonwalker that was originally made from SEGA which is based on Michael Jackson movie called Moonwalker. This game was one of the best game back in 1990.

Reflections

- In my topic I have learnt about a play station and a Xbox also I have learnt about the inventor who made video games. I have love learning about Video games and the Xbox.
