

MINECRAFT 2

Build a school.

In one of the school rooms make many signs that include all the words you know how to read and write.

In another room make a library with book shelves. Add signs into the library telling us about your favourite books.

Around the outside of the school create a playground. What interesting things would you include?

How can the children in your school stay safe from mobs. Build something to keep them safe.

Create a word find using minecraft words. You may need some adult help with this.

Using a paper bag from the supermarket make a minecraft mask.

If you can't play on MINECRAFT you can always draw your ideas so that you can create them later on.
